

# SPIRALNET

## Resin Infusion Line

Vacuum infusion

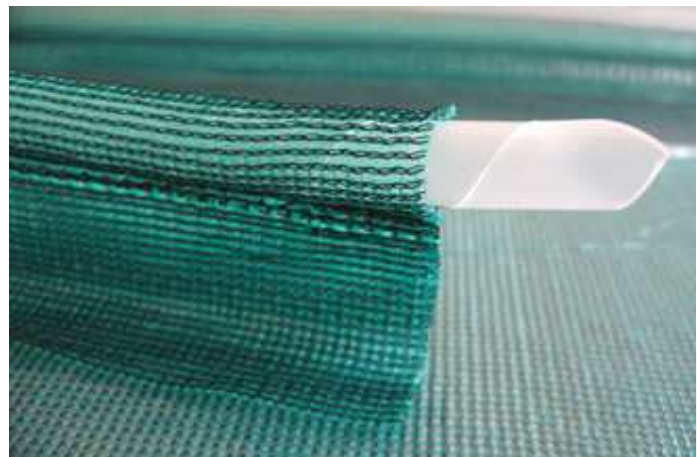

### DESCRIPTION

**SPIRALNET** is a vacuum or resin infusion line. When using a spiral tube as a resin line in vacuum infusion process, one of the biggest issues is the **marking of the laminate**. In order to get rid of this problem, DIATEX developed a ready to use advanced solution: **SPIRALNET**. This product **combines a tube mesh together with a spiral tube** in order to optimize the resin distribution and avoid the marking of the laminate during the infusion process. SPIRALNET can be also **used as vacuum line**: it can also be used to replace the mould flange when this one is too narrow.

#### Advantages:

- No marking of the laminate
- Ready to use
- Standard supply: rolls of 50 lm
- 2 dimensions of spiral tubing
- Can be used with all nets
- Assembly technology: weld

Use our connector  
**XM-1012/1214** to  
connect a 12mm pipe

### STORAGE

Keep this product at room temperature and normal hygrometry.

### CHARACTERISTICS / PRESENTATION

Color	Spiral pipe diameter	Max. Serv. Temp.	Net	Width folded	Length
Green	12 - 14 mm	90°C	OM70	65 mm	100 m
	14 - 17 mm
